11. Rationale for the Scheme:

Reduction of capital of the Transferee Company in the manner set out in this Scheme can provide benefits to the shareholders and stakeholders as under:

- The Transferee Company will represent its true and fair financial position with an efficient capital structure so that post-amalgamation capital structure is in line with the size of the business operations;
- The Transferee Company will have more efficient capital structure;

- Reduction in the authorized share capital of the Transferee Company to the minimum extent possible thereby optimizing the split between the paid-up equity share capital and the premium on any further fund raise by the Transferee Company, if any, thereby reducing the cost of future fund raising, if any;
- Reduction in the costs associated for such change in the authorized share capital which would in turn benefit the shareholders, especially the public shareholders at large;
- The proposed reduction of equity share capital would not have any impact on the shareholding pattern of the Transferee Company except on account on amalgamation of the Transferor Company with the Transferee Company; and
- It does not involve any financial outlay and therefore, would not affect the ability or liquidity of the Transferee Company to meet its obligations or commitments in the normal course of business. Further, it would also not in any way adversely affect the ordinary operations of the Transferee Company

As a part of the overall restructuring exercise, it is desired to merge the Transferor Company with the Transferee Company.

The amalgamation would have the following benefits:

- Enhancement of operational, organizational and financial efficiencies, and achieve economies of scale by pooling of resources;
- Unification and streamlining of legal and regulatory compliances currently required to be carried out by both, the Transferor Company and the Transferee Company;
- Elimination of multiple record keeping, thus resulting in reduced expenditure and significant reduction in the multiplicity of regulatory compliances; and
- Improved organizational capability and leadership, arising from the pooling of human capital that has diverse skills, talent and vast experience to compete in increasingly competitive industry.

by the Transferee Company, if any, thereby reducing the cost of future fund raising, if any;

- Reduction in the costs associated for such change in the authorized share capital which would in turn benefit the shareholders, especially the public shareholders at large;
- The proposed reduction of equity share capital would not have any impact on the shareholding pattern of the Transferee Company except on account on amalgamation of the Transferor Company with the Transferee Company; and
- It does not involve any financial outlay and therefore, would not affect the ability or liquidity of the Transferee Company to meet its obligations or commitments in the normal course of business. Sub: Recommendation of fair share entitlement ratio in relation to scheme of arrangement and amalgamation between Kirti Investments Limited ('KIL' or 'the Transferor Company') and Kedia Construction Company Limited ('KCCL' or 'the Transferee Company') and their respective shareholders and creditors

Dear Sir/ Madam,

I refer to engagement letter dated June 11 2024, whereby Vivek G Gaggar ("I" or "VG" or "me") is appointed by Kirti Investments Limited ('KIL' or 'the Transferor Company') and Kedia Construction Company Limited ('KCCL' or 'the Transferee Company'), for recommendation of fair equity share exchange ratio for the proposed scheme of arrangement and amalgamation between KIL and KCCL and their respective shareholders and creditors on a going concern basis with effect from the Appointed Date, as more particularly provided for in the Scheme under Sections 230 to 232 of the Companies Act, 2013 ("Scheme").

KIL and KCCL are hereinafter jointly referred to as "Companies" or "Clients" and individually referred to as "Company", as the context may require.

The fair equity share exchange ratio for this report refers to number of equity shares of KCCL, which would be issued to the equity shareholders of KIL pursuant to the Scheme.

For the purpose of this report, I have considered the Valuation Date as March 31, 2024 ("Valuation Date").

For the purpose of this valuation, the bases of value is 'Relative Value' and the valuation is based on 'Going Concern' premise.

SCOPE AND PURPOSE OF THIS REPORT

"KIL" or "the Transferor Company" means Kirti Investments Limited, (CIN: L99999MH1974PLC017826) a company incorporated under the Companies Act, 1956 and having its registered office at 202, 2nd Floor, A-Wing, Bldg. No.3, Sir M.V. Road, Rahul Mittal Industrial Estate, Andheri East Mumbai - 400059. The equity shares of the Transferee Company are currently listed on the Metropolitan Stock Exchange of India Limited ("MSE"). KIL is engaged in the business of providing estate agency and consultancy services.

"KCCL" or "the Transferee Company" means Kedia Construction Company Limited, (CIN: L45200MH1981PLC025083) a company incorporated under the Companies Act, 1956 and having its registered office at 202, 2nd Floor, A-Wing, Bldg. No.3, Sir M.V. Road, Rahul Mittal Industrial Estate, Andheri East Mumbai - 400059. The equity shares of KCCL are currently listed on the Metropolitan Stock Exchange of India Limited ("MSE").

BSE Limited ("BSE"). KCCL is primarily engaged in the business of construction, construction contractors and land developers.

I understand that the management of the Companies ("the Management") is *inter alia* contemplating amalgamation of KIL with KCCL in the manner as provided in the Scheme.

The aforesaid amalgamation is proposed pursuant to the Scheme under the provisions of Sections 230-232 and the other applicable provisions of the Companies Act, 2013 (including any statutory modifications, reenactment, or amendments thereof) and other capital market laws and other statutory enactments framed in this regard, as may be required to be complied.

In this connection, KIL and KCCL have appointed VG, Registered Valuers - Securities or Financial Assets, to submit a share exchange ratio report for recommending the fair equity share exchange ratio to the Audit Committee / Board of Directors / any other committee formulated by the respective Companies in this regard, for issue of KCCL's equity shares to the equity shareholders of KIL, as consideration for the Scheme ("Report").

The scope of my services is to conduct a relative (and not absolute) valuation of equity shares of the Companies and report a fair equity share exchange ratio for the Proposed Amalgamation in accordance with ICAI Valuation Standards 2018 issued by the Institute of Chartered Accountants of India.

I have been provided with the audited financial statements of KIL and KCCL for the year ended March 31, 2024. I have taken into consideration the current market parameters in my analysis and have made adjustments for additional facts made known to us. The management of KIL has informed me that there are no unusual/abnormal events materially impacting their operating/financial performance after March 31, 2024 till the Report Date. I have been informed by the management of KCCL that a transaction approved by shareholders of KCCL on 29th December 2023 is not yet fully implemented due to certain regulatory requirements. Accordingly, I have made certain necessary adjustments to the valuation based on the financial statements of KCCL as at March 31, 2024 considering the terms of the transaction, information and representation provided by the management of KCCL as the financial impact of the said transaction may be material in my belief. Further, Companies have represented that to the best of their knowledge, material information regarding the business of each of the Companies has been disclosed to me.

I have relied on the above while arriving at the fair equity share exchange ratio for the Scheme as of the Valuation Date of March 31, 2024.

I have been informed that till the Scheme becomes effective:-

- neither Companies would declare any substantial dividend
- in the event that either of the Companies restructure their equity share capital by way of share split/ consolidation/ issue of bonus shares / merger/ demerger / reduction of share capital before the Scheme becomes effective, the issue of shares pursuant to the fair equity share exchange ratio recommended in this Report shall be adjusted accordingly to take into account the effect of any such corporate actions.

This Report is my deliverable for the above engagement.

This Report is subject to the scope, assumptions, qualifications, exclusions, limitations and disclaimers detailed hereinafter. As such, the Report is to be read in totality and not in parts.

SHAREHOLDING PATIERN

The shareholding pattern of the Companies as on March 31, 2024 is as follows:

Shareholding Pattern as on March 31, 2024	KIL		KCCL	
	Number of shares	% shareholding	Number of shares	% shareholding

Total	2,20,00,000	100.00	30,00,000	100.00

APPROACH FOR RECOMMENDATION OF FAIR EQUITY SHARE EXCHANGE RATIO

The Scheme *inter alia* contemplates a) reduction of the face value of equity share capital of KCCL and b) the amalgamation of KIL with KCCL. Based on the explanation provided by the management of KCCL, the proposed reduction of face value of equity shares shall not impact the value of fair value of equity shares of KCCL as the proposed reduction of face value of equity shares does not involve any financial outlay. Accordingly, I have not considered the proposed reduction of face value of equity shares of KCCL to determine the fair value of the equity shares of KCCL for the purpose of recommendation of fair equity share exchange ratio.

Arriving at the fair equity share exchange ratio for the Scheme would require determining the relative value of equity shares of KIL and that of KCCL. These values are to be determined independently, but on a relative basis for the Companies, without considering the effect of the Scheme.

My choice of methodology of valuation has been arrived at using usual and conventional methodologies adopted for amalgamation and reasonable judgment, in an independent and bona fide manner.

The Valuation Approach adopted by me is given in Annexure I.

BASIS OF FAIR EQUITY SHARE EXCHANGE RATIO

The fair basis of the Scheme would have to be determined after taking into consideration all the factors, approaches and methods considered appropriate by us. Though different values may have been arrived at under each of the approaches/ methods, as mentioned in the Annexure 1, for the purposes of recommending the Fair Equity Share Exchange Ratio it is necessary to arrive at a single value for the shares of the companies involved in Scheme. It is however important to note that in doing so, I am not attempting to arrive at the absolute values of the shares of the Companies but at their relative values to facilitate the determination of a Fair Equity Share Exchange Ratio. For this purpose, it is necessary to give appropriate weights to the values arrived at under each approach/ method.

The Fair Equity Share Exchange Ratio has been arrived at on the basis of a relative equity valuation of KIL and KCCL based on the various approaches/ methods explained in the Annexure 1 and various qualitative factors relevant to each company and the business dynamics and growth potentials of the businesses of these Companies, having regard to information base, key underlying assumptions and limitations.

While I have provided my recommendation of the Fair Equity Share Exchange Ratio based on the

information available and within the scope and constraints of my engagement, others may have a different opinion as to the Fair Equity Share Exchange Ratio. The final responsibility for the determination of the exchange ratio at which the Scheme shall take place will be with the Board of Directors of the respective Companies, who should take into account other factors such as their own assessment of the Scheme and input of other advisors.

I have independently applied approaches / methods discussed in the Annexures, as considered appropriate, and arrived at the relative value per share of the Companies for determination of Fair Share Exchange Ratio for the Scheme. To arrive at the consensus on the fair equity share exchange ratio for the Scheme, suitable minor adjustments / rounding off have been done.

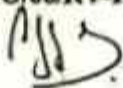

In the light of the above, and on a consideration of all the relevant factors and circumstances as discussed and outlined hereinabove, I recommend the following fair equity share exchange ratio for the Scheme:

"38 (Thirty Eight) fully paid up equity shares having face value of INR 1/- (Indian Rupees One only) of the Transferee Company shall be issued and allotted for every 100 (Hundred) equity shares having face value of INR 5/- (Indian Rupees Five only) each held in the Transferor Company."

It should be noted that I have not examined any other matter including economic rationale for the Scheme per se or accounting, legal or tax matters involved in the Scheme.

Respectfully submitted,

Annexure I:- Approach to Valuation

"Value is a word of many meanings". The term "value" can have different connotations depending upon the purpose for which it is intended to be used. The valuation of equity shares of any company would need to be based on a fair value concept. The purpose of fair value is to enable valuer to exercise his discretion and judgement in light of all circumstances, in order to arrive at a value, which is fair to all parties. It is universally recognized that valuation is not an exact science and that estimating values necessarily involves selecting a method or approach that is suitable for the purpose. The application of any particular method of valuation depends upon various factors including nature of its business, overall objective of the transaction and the purpose of valuation.

It may be noted that the Institute of Chartered Accountants of India (ICAI) on June 10, 2018 has issued the ICAI Valuation Standards ("IVS") effective for all the valuation reports issued on or after July 1, 2018. IVS are mandatory for a valuation done under the Companies Act, 2013, and recommendatory for valuation carried out under other statutes/ requirements. I have given due consideration to IVS in carrying out the valuation exercise.

IVS 301 on Business Valuations deals with valuation of a business or business ownership interest (i.e., it includes valuation of equity shares).

Generally, the following three main valuation approaches are adopted to perform the business valuation in correlation with the valuation approaches and methodologies prescribed under ICAI Valuation Standard 103 *Valuation Approaches and Methods*:

- a) Market approach;
- b) Income approach; and
- c) Cost approach

The present valuation exercise of the respective Company is undertaken on a going concern basis, i.e., proceeding on the basis that there is no intention of disposing off its material operating assets. I have briefly summarized each of approaches in the following paragraphs:

a. Market approach:-

Market approach is a valuation approach that uses prices and other relevant information generated by market transactions involving identical or comparable (i.e., similar) assets, liabilities or a group of assets and liabilities, such as a business.

The following are the common methodologies for the market approach:

• Market Price Method:-

The market price of an equity share is the barometer of the true value of the Company in case of listed companies. The market value of shares of the company quoted on a recognized stock exchange, where quotations are arising from regular trading reflects the investor's perception about the true worth of the listed companies. The valuation is based on the principles that market valuations arising out of regular trading captures all the factors relevant to the Company with an underlying assumption that markets are perfect, where transactions are being undertaken between informed buyers and informed sellers on the floor of the recognized stock exchange.

As per the information available on MSE website, the equity shares of KIL were never traded since the date they were admitted on MSE, i.e. August 4, 2015. Since no active quoted price of KIL exists as on Valuation Date or a date closer to Valuation Date, valuing equity shares of KIL under Market Price Method gets ruled out.

As per the information available on BSE website, equity shares of KCCL were never traded on November 29, 2017; which is more than 6 years prior to the Valuation Date.

Vivek G Gagar FCA

| Email: vivek.gagar@nvrando.com

Traded price of this transaction would therefore not be currently relevant. Since no active quoted price of KCCL exists as on Valuation Date or a date closer to Valuation Date, valuing KCCL under Market Price Method gets ruled out.

- **Comparable Companies Multiple Method ("CCM method"):-**
Under the CCM method, the value of the equity share of a company is determined based on publicly available information of the market valuations of the comparable companies on the basis of multiples derived from such market information. This method is applied on the premise that markets are perfect and have captured all the information and factors, which are reflected through their market valuations.

I have not considered it appropriate to value KIL and KCCL as per CCM method since it derives value pre-dominantly from the investment assets it holds. A comparable company, who would also pre-dominantly derive its value from investment assets would have different set of assets which would be completely different in terms of size, nature and risk parameters.

Cost Approach may therefore be more appropriate for the present valuation exercise.

- **Comparable Transaction Multiple Method ("CTM method"):-**
Under the CTM Method, the value of the equity share of a company is determined considering the past transaction of similar companies or itself as well as the market value of comparable companies that have an equivalent business model to the company being valued.

b. Income approach:-

Income approach is the valuation approach that converts maintainable or future amounts (e.g., cash flows or income and expenses) to a single current (i.e. discounted or capitalised) amount. The fair value measurement is determined on the basis of the value indicated by current market expectations about those future amounts.

The most commonly used income approach is Discounted Cash Flow (DCF) Method. Under this method, either:

- the projected free cash flows from business operations available to all providers of capital are discounted at the weighted average cost of capital to such capital providers, on a market participant basis, and the sum of such discounted free cash flows is the value of the business from which value of debt and other capital is deducted, and other relevant adjustments made to arrive at the value of the equity - Free Cash Flows to Firm (FCFF) technique. This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to all the capital providers (namely shareholders and creditors), weighted by their relative contribution to total capital of the company. The opportunity cost to the capital provider is the rate of return the capital provider expects to earn on other

equivalent risk; or

- the projected free cash flows from business operations available to equity shareholders (after deducting cash flows attributable to the debt and other capital providers) are discounted at the cost of equity, on a market participant basis, and the sum of such discounted free cash flows, after making other relevant adjustments, is the value of the equity - Free Cash Flows to Equity (FCFE) technique. This discount rate, which is applied to the free cash flows, should reflect the opportunity cost to the equity capital providers. The opportunity cost to the equity capital provider equals the rate of return such equity capital provider expects to earn on other investments of equivalent risk.

Other method is the Earnings Capitalisation Value (ECV) Method. This method involves determination of the maintainable earnings level of the company from its operations, based on past and/ or projected working results. These earnings are then capitalized at a rate, which in the opinion of the valuer combines an adequate expectation of reward from the enterprise risk, to arrive at the value of the company.

Having regard to the businesses in which the Companies operate, projecting financials of the Companies on a reliable basis, to afford a relative comparison, is difficult and involves considerable subjectivity and hence such projections have not been made available for the present exercise. Further, the Companies have substantial investment assets and this method involves valuing a company based in future cash flows. However, the future cash flows from investment assets might not be accurate and reliable when computing Companies' worth. Hence, I have not considered the Income Approach

c. Cost approach (Net Assets Value method)

In case of the 'Cost approach', the value per equity share is determined by arriving at the Net Assets (Assets Less Liabilities) of the Company. The said approach is considered taking into account fair value of assets and liabilities, to the extent possible, the respective asset would fetch or liability is payable as on the Valuation Date. The following adjustments be made to arrive at the Fair Value:-

- The Fair Value of Quoted Shares held by the Company, if any, be considered at Market Value of such shares;
- The Fair Value of Unquoted Shares held by the Company, if any, in other entities be arrived at as per suitable approach to that entity to arrive at Fair Value of Investments held by the Company;
- The Fair Value of immovable properties, if any, held by the Company be considered at Market Value / Ready Reckoner Value as on the Valuation Date, as made available by the management of the Company. The actual realizable value that is likely to be fetched upon sale of the property under consideration shall entirely depend on the demand and supply of the same in the market at the time of sale;
- Adjustments may be made to book value of any other assets for their recoverability on conservative basis after taking into account the management representations and their estimate of the recoverability of the same;
- Liabilities of the company be considered at their respective Book Values or their payable amounts as on the Valuation Date; and
- Potential Contingent Liability, if any, be considered based on the discussions with the management and their reasonable estimate of the outflow on account of the same.

Alternatively, the value may be determined considering the book value of the

(Assets Less Liabilities) of the Company and/or replacement cost basis, to the extent possible.

When conducting any valuation exercise, there are generally two different types of companies:

- an operating company, which is in business primarily to derive profits through the offering of some product or service, or
- a holding company, which is usually established to derive profits primarily through the holding of assets for investment purposes.

In certain situations where an operating company is asset-intensive or has operating income that is consistently less than the value of the assets that it holds, I evaluate the company based more on the value of its assets than on the value of its operating income. A holding company typically does not have ongoing operations other than the retention and management of assets in anticipation of future sale or trade. These assets often consist of cash, marketable securities, equipment, and real estate. The valuation of these companies usually relies significantly upon the asset approach, which estimates business value based upon the market value of the underlying assets rather than upon the income producing capacity of the company or the market values of similarly situated and comparable companies. The prevalent appraisal methods under the asset approach involves determining net asset value, which can be represented as the market value of company assets net of liabilities.

KIL and KCCL have investments in other entities. The operating income of the Companies is consistently less than the value of the assets that it holds. It therefore derives its value, substantially from such assets which have no relation to its future earning capacity or comparable transactions of similar companies. Given the nature and specifics of the Companies, I have considered Net Assets Value method.

The equity value so arrived at under any of the approaches, as may be appropriate for the present valuation exercise is divided by the outstanding number of equity shares (on fully diluted basis) to arrive at the value per equity share of KIL and KCCL. The computation of fair equity share exchange ratio for Scheme is tabulated herein below:

3. Rationale / Need for the Amalgamation:

Reduction of capital of the Transferee Company in the manner set out in this Scheme can provide benefits to the shareholders and stakeholders as under:

- The Transferee Company will represent its true and fair financial position with an efficient capital structure so that post-amalgamation capital structure is in line with the size of the business operations;
- The Transferee Company will have more efficient capital structure;
- The proposed reduction of equity share capital would not have any impact on the shareholding pattern of the Transferee Company except on account on amalgamation of the Transferor Company with the Transferee Company; and
- It does not involve any financial outlay and therefore, would not affect the ability or liquidity of the Transferee Company to meet its obligations or commitments in the normal course of business. Further, it would also not in any way adversely affect the ordinary operations of the Transferee Company

As a part of the overall restructuring exercise, it is desired to merge the Transferor Company with the Transferee Company.

The amalgamation would have the following benefits:

- Enhancement of operational, organizational and financial efficiencies, and achieve economies of scale by pooling of resources;
- Unification and streamlining of legal and regulatory compliances currently required to be carried out by both, the Transferor Company and the Transferee Company;
- Elimination of multiple record keeping, thus resulting in reduced expenditure and significant reduction in the multiplicity of regulatory compliances; and
- Improved organizational capability and leadership, arising from the pooling of human capital that has diverse skills, talent and vast experience to compete in increasingly competitive industry.

4. Synergies of business of the entities involved in the Scheme

The Committee reviewed the Scheme and noted that the Scheme would result in consolidation of the Transferor Company in the Transferee Company ensuring a simplified and streamlined group structure. It helps in achieving reduction in overall operational and compliance costs.

5. Impact of the Scheme on the shareholders of the Company

The Committee reviewed the draft Scheme, Valuation Report, Fairness Opinion and Draft Statutory Auditors Certificate and noted the same and recommended the following:

- 5.1. For the reduction of share capital, the Scheme does not entail any discharge of consideration by the Transferee Company (either in form of cash, shares or otherwise). Hence, the interest of the shareholders is not adversely affected pursuant to the capital reduction. The Transferee Company's shareholding pattern (before giving effect to the proposed amalgamation) subsequent to the reduction of share capital will remain unchanged.
- 5.2. Upon the Scheme becoming effective, entire undertaking including all properties, rights and powers and all debts, liabilities, duties and obligations of the Transferor Company shall be transferred to and vested with the Transferee Company on a going concern basis.
- 5.3. Further, pursuant to the Scheme, in consideration for the amalgamation, the Transferee Company will issue its equity shares to the shareholders of the Transferor Company based on the Valuation Report.
- 5.4. The provisions of the Part III of the Scheme have also been drawn up to comply with the conditions relating to "Amalgamation" as defined under section 2(1B) of the Income Tax Act, 1961 and therefore, it may not have any tax implications.
- 5.5. Based on the above, there is a proposed change in the shareholding pattern of the Transferee Company as the shareholders of the Company would become the shareholders of the Transferee Company pursuant to the Scheme to the extent of receiving new equity shares basis the share exchange ratio. However, the Committee is of the informed opinion that the proposed Scheme is in the best interests of the shareholders of the Company and not detrimental to the interest of the shareholders, including the minority shareholders of the Company.

Further, the Fairness Opinion confirmed that the share entitlement in the Valuation Report is fair to the Transferor Company, the Transferee Company and their respective shareholders.

6. Cost benefit analysis of the Scheme

The Committee is of the opinion that the expected benefits of the Scheme, as described hereinabove, which are not quantifiable, would offset the impact of transaction costs. Further, the Committee is of the informed opinion that the Scheme is in best interests of the Companies and their respective shareholders. The impact of the Scheme on the shareholders including the public shareholders would be same in all respects and no shareholder is expected to have any disproportionate advantage or disadvantage in any manner.

1.4. KIL and KCCL collectively be referred to as the "Companies".

1.5. The Draft Scheme, as approved by the Audit Committee, Committee of the Independent Directors and the Board of Directors of the Companies on June 21, 2024 was submitted to the stock exchange(s) for their review and observations. During the course of such review, stock exchange(s) have sought certain clarifications which the Companies has duly provided. To ensure that the clarifications provided by the Companies are duly incorporated in the Scheme, it is proposed to modify the scheme to address the concerns raised with respect to the accounting treatment of the capital reduction and the rationale for the proposed capital reduction as well as amalgamation.

1.6. The revised Report of the Committee is made in order to comply with the requirements of the Master Circular No. SEBI/HO/CFD/POD-2/P/CIR/2023/93 dated June 20, 2023 ("SEBI Circular"), as issued by the Securities and Exchange Board of India ("SEBI"), read with the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 ("SEBI Listing Regulations"), after considering the following:

1.6.1. Modified Draft Scheme;

1.6.2. Valuation Report dated June 18, 2024, issued by Mr. Vivek G Gaggar (IBBI Registration No.: IBBI/RV/06/2022/14829), being registered valuer appointed for the purpose of the Scheme ("Valuation Report");

- The Transferee Company will represent its true and fair financial position with an efficient capital structure so that post-amalgamation capital structure is in line with the size of the business operations;
- The Transferee Company will have more efficient capital structure;
- Reduction in the authorized share capital of the Transferee Company to the minimum extent possible thereby optimizing the split between the paid up equity share capital and the premium on any further fund raise by the Transferee Company, if any, thereby reducing the cost of future fund raising, if any;
- Reduction in the costs associated for such change in the authorized share capital which would in turn benefit the shareholders, especially the public shareholders at large;
- The proposed reduction of equity share capital would not have any impact on the shareholding pattern of the Transferee Company except on account on amalgamation of the Transferor Company with the Transferee Company; and
- It does not involve any financial outlay and therefore, would not affect the ability or liquidity of the Transferee Company to meet its obligations or commitments in the normal course of business. Further, it would also not in any way adversely affect the ordinary operations of the Transferee Company

As a part of the overall restructuring exercise, it is desired to merge the Transferor Company with the Transferee Company.

The amalgamation would have the following benefits:

- Enhancement of operational, organizational and financial efficiencies, and achieve economies of scale by pooling of resources;

- The Transferee Company will have more efficient capital structure;
- Reduction in the authorized share capital of the Transferee Company to the minimum extent possible thereby optimizing the split between the paid up equity share capital and the premium on any further fund raise by the Transferee Company, if any, thereby reducing the cost of future fund raising, if any;
- Reduction in the costs associated for such change in the authorized share capital which would in turn benefit the shareholders, especially the public shareholders at large;
- The proposed reduction of equity share capital would not have any impact on the shareholding pattern of the Transferee Company except on account on amalgamation of the Transferor Company with the Transferee Company; and
- It does not involve any financial outlay and therefore, would not affect the ability or liquidity of the Transferee Company to meet its obligations or commitments in the normal course of business. Further, it would also not in any way adversely affect the ordinary operations of the Transferee Company

As a part of the overall restructuring exercise, it is desired to merge the Transferor Company with the Transferee Company.

The amalgamation would have the following benefits:

- Enhancement of operational, organizational and financial efficiencies, and achieve economies of scale by pooling of resources;
- Unification and streamlining of legal and regulatory compliances currently required to be carried out by both, the Transferor Company and the Transferee Company;
- Elimination of multiple record keeping, thus resulting in reduced expenditure and significant reduction in the multiplicity of regulatory compliances; and
- Improved organizational capability and leadership, arising from the pooling of human capital that has diverse skills, talent and vast experience to compete in increasingly competitive industry.

4. Synergies of business of the entities involved in the modified draft Scheme

The Committee reviewed the modified draft Scheme and noted that the Scheme would result in consolidation of services business of the Transferor Company in the Transferee Company. The Scheme also ensures simplified and streamlined group structure. It helps in achieving reduction in overall operational and compliance costs.

The Committee is of the informed opinion that the proposed Scheme is in the best interests of the shareholders of the Company and not detrimental to the interest of the shareholders, including the minority shareholders of the Company.

Further, the Fairness Opinion confirmed that the share entitlement in the Valuation Report is fair to the Transferor Company, the Transferee Company and their respective shareholders.

6. Cost benefit analysis of the Scheme

The Committee is of the opinion that the expected benefits of the Scheme, as described hereinabove, which are not quantifiable, would offset the impact of transaction costs. Further, the Committee is of the informed opinion that the Scheme is in best interests of the Companies and their respective shareholders. The impact of the Scheme on the shareholders including the public shareholders would be same in any respects and no shareholder is expected to have any disproportionate advantage or disadvantage in any manner.

3. Rationale for Amalgamation:

Reduction of capital of the Transferee Company in the manner set out in this Scheme can provide benefits to the shareholders and stakeholders as under:

- The Transferee Company will represent its true and fair financial position with an efficient capital structure so that post-amalgamation capital structure is in line with the size of the business operations;
- The Transferee Company will have more efficient capital structure;
- The proposed reduction of equity share capital would not have any impact on the shareholding pattern of the Transferee Company except on account of amalgamation of the Transferor Company with the Transferee Company; and
- It does not involve any financial outlay and therefore, would not affect the ability or liquidity of the Transferee Company to meet its obligations or commitments in the normal course of business. Further, it would also not in any way adversely affect the ordinary operations of the Transferee Company.

As a part of the overall restructuring exercise, it is desired to merge the Transferor Company with the Transferee Company.

The amalgamation would have the following benefits:

- Enhancement of operational, organizational and financial efficiencies, and achieve economies of scale by pooling of resources;
- Unification and streamlining of legal and regulatory compliances currently required to be carried out by both, the Transferor Company and the Transferee Company;
- Elimination of multiple record keeping, thus resulting in reduced expenditure and significant reduction in the multiplicity of regulatory compliances; and
- Improved organizational capability and leadership, arising from the pooling of human capital that has diverse skills, talent and vast experience to compete in increasingly competitive industry.

4. Impact of the Scheme on the shareholders of the Company

The Committee reviewed the draft Scheme, Valuation Report, Fairness Opinion and Draft Statutory Auditors Certificate and noted the same and recommended the following:

- 4.1. For the reduction of share capital, the Scheme does not entail any discharge of consideration by the Transferee Company (either in form of cash, shares or otherwise). Hence, the interest of the shareholders is not adversely affected pursuant to the capital reduction. The Transferee Company's shareholding pattern (before giving effect to the proposed amalgamation) subsequent to the reduction of share capital will remain unchanged.
- 4.2. Upon the Scheme becoming effective, entire undertaking including all properties, rights and powers and all debts, liabilities, duties and obligations of the Transferor Company shall be transferred to and vested with the Transferee Company on a going concern basis.
- 4.3. Further, pursuant to the Scheme, in consideration for the amalgamation, the Transferee Company will issue its equity shares to the shareholders of the Transferor Company as per the Valuation Report.

- 4.4. The provisions of the Part III of the Scheme have also been drawn up to comply with the conditions relating to "Amalgamation" as defined under section 2(1B) of the Income Tax Act, 1961 and therefore, it may not have any tax implications.
- 4.5. Based on the above, there is a proposed change in the shareholding pattern of the Company pursuant to the Scheme to the extent of issuance of new equity shares basis the share exchange ratio. However, the Committee is of the informed opinion that the proposed Scheme is in the best interests of the shareholders of the Company and not detrimental to the interest of the shareholders, including the minority shareholders of the Company.
- 4.6. Further, the Fairness Opinion confirmed that the share entitlement in the Valuation Report is fair to the Transferor Company, the Transferee Company and their respective shareholders.

M/S. KIRTI INVESTMENTS LIMITED

ANNUAL REPORT

FY 2024-25

INDEPENDENT AUDITOR'S REPORT

To the members of **KIRTI INVESTMENTS LIMITED**

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying Standalone Financial Statements of **KIRTI INVESTMENTS LIMITED** ("the Company"), which comprise the Balance Sheet as at March 31, 2025, the Statement of Profit and Loss (including Other Comprehensive Income), the Cash Flow Statement and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information (herein referred to as "Standalone Financial Statements")

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Standalone Financial Statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, and its profit, total comprehensive income, its cash flows and changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of Standalone Financial Statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those SAs are further described in the Auditor's responsibilities for the audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Standalone Financial Statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Standalone Financial Statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Standalone Financial Statements of the current period. These matters were addressed in the context of our audit of the Standalone Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

We have determined the matters described below to be the key audit matters to be communicated in our report:

Sr. No.	Key Audit Matter	Auditor's Response
1.	<p>Assessment of fair value of Inventories</p> <p>The Company's Inventories Consists of Quoted and Unquoted Equity Shares.</p> <p>Inventories of Quoted and Unquoted Equity Shares are valued at fair value through profit or loss account as required by Ind AS 109.</p> <p>Refer Note no. 2B (J) of "Significant Accounting Policies".</p> <p>The valuation of Inventories of Quoted and Unquoted Equity Shares is determined a Key Audit Matter as the carrying value of inventories represents 76.60 per cent of company's total assets and determination of fair value involves significant management judgement and estimates.</p>	<p>Principal Audit Procedures</p> <p>Our audit procedures included the following:</p> <ul style="list-style-type: none"> • Evaluating the appropriateness of company's policy on Valuation of Inventories with reference to the applicable accounting standards. • Our audit approach consisted testing of the design and operating effectiveness of the internal controls and substantive testing. • Performing substantive audit procedures in order to test the accuracy of inventory valuation. • For quoted shares, the valuations are verified with independent pricing sources. • For Unquoted shares, the valuations are verified based on the last audited financial statements available. • We enquired with the management regarding significant judgments and estimates involved in the valuation. <p>In addition, we assessed the appropriateness of the Company's disclosures in respect of inventory valuation.</p>

We draw attention to the following matters:

- a. In respect of investment in property having carrying amount of Rs.10.99 Lakhs, the company has adopted Cost Model for subsequent measurement of Investment in Property including rights therein. However, the company has not made any disclosure as required by "Ind AS 40" of Fair Market Value of the said property in the accompanying standalone financial statements. In view of the management, the value of the property is not ascertainable and hence the valuation report from independent valuer is not obtained.
- b. Note no. 35 to the Financial Statements regarding filing of a petition with National Company Law Tribunal under section 230 to 232 of the Companies Act, 2013 for Amalgamation of Kirti Investments Limited ("Transferor Company" or "KIL") with Kedia Construction Company Limited ("Transferee Company" or "KCCL"). As the final order for approval of the scheme is pending, no effect of scheme of amalgamation has been given in the accompanying financial statements.

Our opinion is not modified in respect of these above matters.

Information Other than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information in the Management Discussion and Analysis, Board's Report including Annexure to the Board's Report and Corporate Governance and Shareholder's Information, but does not include Standalone Financial Statements and our auditor's report thereon.

Our opinion on Standalone Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of Standalone Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Standalone Financial Statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Standalone Financial Statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash

flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Standalone Financial Statements:

Our objectives are to obtain reasonable assurance about whether the Standalone Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the

Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Financial Statements, including the disclosures, and whether the Standalone Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Standalone Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Standalone Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Standalone Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the

adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

ANNEXURE 'B' TO THE INDEPENDENT AUDITORS' REPORT

Report on the Internal Financial Controls with reference to the aforesaid Standalone Financial Statements under Clause (i) Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

(Referred to in paragraph (2) (f) under 'Report on Other Legal and Regulatory Requirements' section of our Independent Auditors' Report of KIRTI INVESTMENTS LIMITED on the Standalone Financial Statements for the year ended March 31, 2025)

We have audited the internal financial controls over financial reporting of **KIRTI INVESTMENTS LIMITED** ("the Company") as of March 31, 2025 in conjunction with our audit of the Standalone Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal controls with reference to Standalone Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness

exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls over financial reporting with reference to these Standalone Financial Statements.

Meaning of Internal Financial Controls with reference to Standalone Financial Statements

A company's internal financial controls with reference to Standalone Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Standalone Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to Standalone Financial Statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the Standalone Financial Statements.

Inherent Limitations of Internal Financial Controls with reference to Standalone Financial Statements

Because of the inherent limitations of internal financial controls with reference to Standalone Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Standalone Financial Statements to future periods are subject to the risk that the internal financial control with reference to Standalone Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in

the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTE 2 – BASIS OF PREPARATION AND PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES**Note 2A - BASIS OF PREPARATION AND PRESENTATION:****i. Statement of compliance**

These financial statements ("the Financial Statements") are prepared in accordance with the Indian Accounting Standards ('Ind AS') as notified by Ministry of Corporate Affairs ('MCA') under Section 133 of the Companies Act, 2013 ('Act') read with the Companies (Indian Accounting Standards) Rules, 2015, as amended and other relevant provisions of the Act. The Company has uniformly applied the accounting policies for the periods presented in these financial statements.

ii. Accounting convention

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

iii. Presentation

The Balance Sheet, the Statement of Profit and Loss and the Statement of Changes in Equity are prepared and presented in the format prescribed in the Division II of Schedule III to the Act. The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows".

The Standalone financial statements are presented in Indian Rupees (Rs.) and all values are rounded to the nearest Lakhs, except when otherwise indicated.

iv. Use of estimates and judgements

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in the note 2B of the financial statements.

Note 2B - SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared using the significant accounting policies and measurement bases summarized as below. These policies are applied consistently for all the periods presented in the financial statements, except where the Company has applied certain accounting policies and exemptions upon transition to Ind AS.

a) Revenue recognition

Revenue from the sale of goods is recognized when (or as) the entity satisfies a performance obligation by transferring a promised good or service to a customer.

The ownership is transferred when (or as) the customer obtains control of that goods.

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

Sales are disclosed net of sales returns and GST.

Other income is comprised primarily of interest income, dividend income, and gain/loss on investments. Interest income is recognized using the effective interest method. Dividend income is recognized when the right to receive payment is established.

b) Foreign Currency Transactions and Reinstatement

Transactions denominated in foreign currency are normally recorded at the customs exchange rate prevailing at the time of transaction. Monetary Items denominated in foreign currencies at the yearend are restated at year end rates. Exchange difference relating to long term monetary items, arising during the year, in so far as they relate to the acquisition of depreciable fixed asset is adjusted to the carrying cost of the fixed asset. All other exchange differences are dealt with in the Statement of Profit and Loss. Non-monetary foreign currency items are carried at cost.

c) Property, plant and equipment

Property, plant and equipment are carried at cost of acquisition or construction, net of recoverable taxes less accumulated depreciation and accumulated impairment losses, if any. Cost includes purchase price, borrowing cost and any cost directly attributable to the bringing the assets to its working condition for its intended use.

Capital work in progress includes cost of property, plant and equipment under installation as at the balance sheet date.

Depreciation on the Property plant and equipment is provided using written down value method over useful life of assets as specified in schedule II to the Companies Act, 2013, Depreciation on Property Plant & equipment addition/deletion during the year has been provided on pro-rata basis from the date of such addition or upto date of such deletion as the case may be. Freehold land is not depreciated.

The assets' residual values, useful lives and method of depreciation are reviewed at each financial year end and are adjusted prospectively, if appropriate.

Property plants and equipment are eliminated from financial statement, either on disposal or when retired from active use. Profits/Losses arising in the case of retirement/disposal of property plant and equipment are recognized in the statement of profit and losses in the year of occurrence.

Leasehold Lands are amortized over period of lease. Buildings constructed on leasehold land are depreciated based on the useful life specified in schedule II to the Companies Act, 2013, where the lease period of land is beyond the life of the building.

d) Intangible Assets

Intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any Cost includes expenditure that is directly attributable to the acquisition of the intangible assets.

Identifiable intangible assets are recognised when it is probable that future economic benefits attributed to the asset will flow to the Company and the cost of the asset can be reliably measured.

Computer software are capitalized at the amount paid to acquire the respective license for use and are amortized over period of useful lives. The assets useful lives are reviewed at each financial year end.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognized.

e) Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred.

f) Depreciation/Amortization on Property, Plant & Equipment

Depreciation/Amortization on Property, Plant & Equipment (other than freehold land and capital work-in-progress) is charged on a Written Down Value Method Basis so as to write off the original cost of the assets over the useful lives. The useful life of the fixed assets has been adopted based on Technical Evaluation and in other cases, as prescribed under the Companies Act, 2013. Details for the same are asunder:

Class of Assets	Range of Useful Life
Building	05 – 60 Years
Plant & Machinery	03 – 15 Years
Furniture & Fixtures	10 Years
Office Machinery	10 Years
Vehicles	08 Years
Intangible Assets	03 – 04 Years

g) Capital Work-in-Progress

Assets under construction wherein assets are not ready for use in the manner as intended by the management are shown as Capital Work-In-Progress.

h) Leases

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease.

Finance leases are capitalized at the commencement of the lease at the inception date at fair value of the leased property or, if lower, at the present value of the minimum lease payments. The corresponding liability is included in the balance sheet as a finance lease liability. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised as finance costs in the statement of profit and loss.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Assets acquired on leases where a significant portion of the risks and rewards of ownership are retained by lessor are classified as operating leases. Operating lease payments are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term except where another systematic basis is more representative of time pattern in which economic benefits from the leased assets are consumed.

i) Impairments of non-current assets

An asset is considered as impaired when at the date of Balance Sheet, there are indications of impairment and the carrying amount of the asset, or where applicable, the cash generating unit to which the asset belongs, exceeds its recoverable amount (i.e. the higher of the net asset selling price and value in use). The carrying amount is reduced to

the recoverable amount and the reduction is recognised as an impairment loss in the statement of profit and loss. The impairment loss recognised in the prior accounting period is reversed if there has been a change in the estimate of recoverable amount. Post impairment, depreciation is provided on the revised carrying value of the impaired asset over its remaining useful life.

j) Inventories

In general, all inventories of stock in trade, finished, work-in-progress etc. are stated at lower of cost or net realizable value. Cost of inventories comprise of all cost of purchase, cost of conversion and other cost incurred in bringing the inventory to their present location and condition. Cost of Work in progress are determined at acquisition cost plus direct costs of development and other direct overheads attributable to inventory.

The inventories of financial instruments are stated at fair value in the following manner:

- Investments in quoted instruments are valued at fair value through Profit & Loss account as on balance sheet date based on the market price.
- Investments in unquoted instruments are valued at fair value through Profit & Loss account on basis of last audited financial statements available in respect of such investments.

k) Investments

Investments in quoted instruments are valued at fair value through Profit & Loss account as on balance sheet date based on the market price while investments in unquoted instruments are valued at fair value through Profit & Loss account on basis of last audited financial statements available in respect of such investments.

l) Cash and Cash equivalents

Cash and cash equivalents include cash at bank and cash in hand and highly liquid interest-bearing securities with maturities of three months or less from the date of inception/acquisition.

In the cash-flow statement, cash and cash equivalents are shown net of bank overdrafts, which are included as current borrowings in liabilities on the balance sheet.

m) Borrowing Costs

Borrowing costs specifically relating to the acquisition or construction of qualifying assets that necessarily takes a substantial period of time to get ready for its intended use are capitalised (net of income on temporarily deployment of funds) as part of the cost of such assets. Borrowing costs consist of interest and other costs that the Company incurs in connection with the borrowing of funds. For general borrowing used for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalisation is determined by applying a capitalisation rate to the expenditures on that asset. The capitalisation rate is the weighted average of the borrowing costs applicable to the borrowings of the Company that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalised during a period does not exceed the amount of borrowing cost incurred during that period. All other borrowing costs are expensed in the period in which they occur.

n) Taxation

Tax expense recognized in Statement of Profit and Loss comprises the sum of deferred tax and current tax except to the extent it recognized in other comprehensive income or directly in equity.

Current tax comprises the tax payable or receivable on taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. Current tax is computed in accordance with relevant tax regulations. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received after considering uncertainty related to income taxes, if any. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity).

Current tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

Deferred tax is recognised in respect of temporary differences between carrying amount of assets and liabilities for financial reporting purposes and corresponding amount used for taxation purposes. Deferred tax assets are recognised on unused tax loss, unused tax credits and deductible temporary differences to the extent it is probable that the future taxable profits will be available against which they can be used. This is assessed based on the Company's forecast of future operating results, adjusted for significant non-taxable income and expenses and specific limits on the use of any unused tax loss. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date to recover or settle the carrying amount of its assets and liabilities. Deferred tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously. Deferred tax relating to items recognised outside statement of profit and loss is recognised outside statement of profit or loss (either in other comprehensive income or in equity).

Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively

o) Earnings Per Share

Basic earnings per share is computed using the 'net profit for the year attributable to the shareholders (Before and After Exceptional Items)' and weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed using the 'net profit for the year attributable to the shareholder (Before and After Exceptional Items)' and weighted average number of equity and potential equity shares outstanding during the year including share options, convertible preference shares and debentures, except where the result would be anti-dilutive. Potential equity shares that are converted during the year are included in the calculation of diluted earnings per share, from the beginning of the year or date of issuance of such potential equity shares, to the date of conversion.

p) Dividend Distribution:

Annual dividend distribution to the shareholders is recognised as a liability in the period in which the dividends are approved by the shareholders. Dividend payable and corresponding tax on dividend distribution is recognised directly in other equity.

q) Employee Benefits

Short term employee benefits are recognised as an expense in the statement of profit and loss of the year in which the related services are rendered.

Post-employment and other long term employee benefits are charged off in the year in which the amount is paid to the employee.

r) Financial Instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. The company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the financial instrument.

i) Financial Assets**a. Initial recognition and measurement**

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction cost that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date i.e. the date that the Company commits to purchase or sell the asset.

b. Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in three categories:

i) Financials Assets at amortized cost

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, debt instruments are subsequently measured at amortized cost using the effective interest rate method, less impairment, if any.

ii) Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The fair value is measured adopting valuation techniques as per prevailing valuation guidelines, to the extent applicable, as at the reporting date.

iii) Financial assets at fair value through profit or loss

Financial assets which are not classified in any of the above categories are subsequently fair valued through profit or loss.

c. Financial assets - Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e. removed from the Company's statement of financial position) when:

- a) The rights to receive cash flows from the asset have expired, or
- b) The Company has transferred its rights to receive cash flow from the asset.

d. Impairment of financial assets

Trade receivables

In respect of trade receivables, the Company applies the simplified approach of Ind AS 109, which requires measurement of loss allowance at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of trade receivables.

Other financial assets

In respect of its other financial assets, the Company assesses if the credit risk on those financial assets has increased significantly since initial recognition. If the credit risk has not increased significantly since initial recognition, the Company measures the loss allowance at an amount equal to 12-month expected credit losses, else at an amount equal to the lifetime expected credit losses.

When making this assessment, the Company uses the change in the risk of a default occurring over the expected life of the financial asset. To make that assessment, the Company compares the risk of a default occurring on the financial asset as at the balance sheet date with the risk of a default occurring on the financial asset as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition. The Company assumes that the credit risk on a financial asset has not increased significantly since initial recognition if the financial asset is determined to have low credit risk at the balance sheet date.

e. Write-offs

Financial assets are written off either partially or in their entirety to the extent that there is no realistic prospect of recovery. Any subsequent recoveries are credited to impairment on financial instrument on statement of profit and loss.

ii) Financial Liabilities

a. Initial recognition and measurement

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

Financial liabilities are classified, at initial recognition, as at fair value through profit and loss or as those measured at amortized cost.

b. Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

i. Financial liabilities at fair value through profit and loss

Financial liabilities at fair value through profit and loss include financial liabilities held for trading. The Company has not designated any financial liabilities upon initial recognition at fair value through profit and loss.

ii. Financial liabilities measured at amortized cost

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate method except for those designated in an effective hedging relationship.

s) Current and non-current classification:

The Company presents assets and liabilities in statement of financial position based on current/non-current classification.

The Company has presented non-current assets and current assets before equity, non-current liabilities and current liabilities in accordance with Schedule III, Division II of Companies Act, 2013 notified by MCA.

An asset is classified as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle,
- Held primarily for the purpose of trading & manufacturing,
- Expected to be realised within twelve months after the reporting period, or

d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when it is:

- a) Expected to be settled in normal operating cycle,
- b) Held primarily for the purpose of trading, & manufacturing,
- c) Due to be settled within twelve months after the reporting period, or
- d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash or cash equivalents. Deferred tax assets and liabilities are classified as non-current assets and liabilities. The Company has identified twelve months as its normal operating cycle.

t) Provisions, Contingent liabilities and Assets

i. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

ii. Contingent Liabilities

Contingent liability is disclosed for (i) Possible obligations which will be confirmed only by the future events not wholly within the control of the company or (ii) Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

iii. Contingent Assets

Contingent Assets are not recognized in the financial statements. Contingent Assets if any are disclosed in the notes to the financial statements.

u) Significant Accounting Judgements, Estimates and Assumptions:

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based on its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future developments may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Property, plant and equipment and Intangible Assets:

Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation to be recorded during any reporting period. The useful lives and residual values as per Schedule II of the Companies Act, 2013 or are based on the Company's historical experience with similar assets and taking into account anticipated technological changes, whichever is more appropriate.

Recognition of deferred tax assets:

The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilized.

Contingencies:

Management has estimated the possible outflow of resources at the end of each annual reporting financial year, if any, in respect of contingencies/claim/litigations against the Company as it is not possible to predict the outcome of pending matters with accuracy.

Fair value measurements and Impairment of financial assets:

The impairment provisions for financial assets are based on assumptions about risk of default and expected cash loss. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Recoverability of trade receivable:

Judgements are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the credit rating of the counterparty, the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.

Provisions:

Provisions and liabilities are recognised in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability require the application of judgement to existing facts and circumstances, which can be subject to change. Since the cash outflows can take place many years in the future, the carrying amounts of provisions and liabilities are reviewed regularly and adjusted to take account of changing facts and circumstances.

29) Financial Risk Management Framework

Risk Management

The Company's objectives when managing capital are to safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders and maintain an optimal capital structure to reduce the cost of capital. For the purpose of the Company's capital management, capital includes issued equity capital and all other equity reserves attributable to the equity holders of the parent. The primary objective of the Company's capital management is to maximize the shareholders value. The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2025.

The Company manages financial risk relating to the operations through internal risk reports which analyze exposure by degree and magnitude of risk. These risks include market risk, credit risk and liquidity risk. The Company does not enter into or trade financial instruments including derivative financial instruments for speculative purpose.

Credit Risk

The Company is exposed to credit risk from its operating activities (primarily trade receivables) and deposits with banks and other financial instruments. For banks and other financial institutions, only high rated banks/ financial institutions are accepted. Loan given to employees, security deposits are subject to low credit risk and the risk of default is negligible or nil. Hence, no provision has been created for expected credit loss for credit risk arising from these financial assets, The Company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in the credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the company compares the risk of a default occurring on the assesse as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forward looking information, for ex. External credit rating (to the extent available), actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to borrowers ability to meet its obligations.

The credit risk on investment in mutual funds is limited because the counter parties are reputed banks or funds sponsored by reputed bank.

Liquidity Risk Management

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has established an appropriate liquidity risk management framework for the management of the Company's short term, medium term and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

Information Other than the Standalone Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information in the Management Discussion and Analysis, Board's Report including Annexure to the Board's Report and Corporate Governance and Shareholder's Information but does not include Standalone Financial Statements and our auditor's report thereon.

Our opinion on Standalone Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of Standalone Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Standalone Financial Statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Standalone Financial Statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash

flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Standalone Financial Statements:

Our objectives are to obtain reasonable assurance about whether the Standalone Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Financial Statements, including the disclosures, and whether the Standalone Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Standalone Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Standalone Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Standalone Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Financial Statements of the current

period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

ANNEXURE 'B' TO THE INDEPENDENT AUDITORS' REPORT

Report on the Internal Financial Controls with reference to the aforesaid Standalone Financial Statements under Clause (i) Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

(Referred to in paragraph (2) (f) under 'Report on Other Legal and Regulatory Requirements' section of our Independent Auditors' Report of KEDIA CONSTRUCTION COMPANY LIMITED on the Standalone Financial Statements for the year ended March 31, 2025)

We have audited the internal financial controls over financial reporting of KEDIA CONSTRUCTION COMPANY LIMITED ("the Company") as of March 31, 2025 in conjunction with our audit of the Standalone Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal controls with reference to Standalone Financial Statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls over financial reporting with reference to these Standalone Financial Statements.

Meaning of Internal Financial Controls with reference to Standalone Financial Statements

A company's internal financial controls with reference to Standalone Financial Statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Standalone Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to Standalone Financial Statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Standalone Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the Standalone Financial Statements .

Inherent Limitations of Internal Financial Controls with reference to Standalone Financial Statements

Because of the inherent limitations of internal financial controls with reference to Standalone Financial Statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to Standalone Financial Statements to future periods are subject to the risk that the internal financial control with reference to Standalone Financial Statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTE 2 – BASIS OF PREPARATION AND PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

Note 2A - BASIS OF PREPARATION AND PRESENTATION:

i. Statement of compliance

These financial statements ("the Financial Statements") are prepared in accordance with the Indian Accounting Standards ("Ind AS") as notified by Ministry of Corporate Affairs ('MCA') under Section 133 of the Companies Act, 2013 ('Act') read with the Companies (Indian Accounting Standards) Rules, 2015, as amended and other relevant provisions of the Act. The Company has uniformly applied the accounting policies for the periods presented in these financial statements.

ii. Accounting convention

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

iii. Presentation

The Balance Sheet, the Statement of Profit and Loss and the Statement of Changes in Equity are prepared and presented in the format prescribed in the Division II of Schedule III to the Act. The Statement of Cash Flows has been prepared and presented as per the requirements of Ind AS 7 "Statement of Cash Flows".

The Standalone financial statements are presented in Indian Rupees (Rs.) and all values are rounded to the nearest Lakhs, except when otherwise indicated.

iv. Use of estimates and judgements

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amount of assets, liabilities, income, expenses and disclosures of contingent liabilities at the date of these financial statements and the reported amount of revenues and expenses for the years presented. Actual results may differ from the estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are included in the note 2B of the financial statements.

Note 2B - SIGNIFICANT ACCOUNTING POLICIES

The financial statements have been prepared using the significant accounting policies and measurement bases summarized as below. These policies are applied consistently for all the periods presented in the financial statements, except where the Company has applied certain accounting policies and exemptions upon transition to Ind AS.

a) Revenue recognition

Revenue from the sale of goods is recognized when (or as) the entity satisfies a performance obligation by transferring a promised good or service to a customer.

The ownership is transferred when (or as) the customer obtains control of that goods.

Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

Sales are disclosed net of sales returns and GST.

Other income is comprised primarily of interest income, dividend income, and gain/loss on investments. Interest income is recognized using the effective interest method. Dividend income is recognized when the right to receive payment is established.

b) Foreign Currency Transactions and Reinstatement

Transactions denominated in foreign currency are normally recorded at the customs exchange rate prevailing at the time of transaction. Monetary Items denominated in foreign currencies at the yearend are restated at year end rates. Exchange difference relating to long term monetary items, arising during the year, in so far as they relate to the acquisition of depreciable fixed asset is adjusted to the carrying cost of the fixed asset. All other exchange differences are dealt with in the Statement of Profit and Loss. Non - monetary foreign currency items are carried at cost.

c) Property, plant and equipment

Property, plant and equipment are carried at cost of acquisition or construction, net of recoverable taxes less accumulated depreciation and accumulated impairment losses, if any. Cost includes purchase price, borrowing cost and any cost directly attributable to the bringing the assets to its working condition for its intended use.

Capital work in progress includes cost of property, plant and equipment under installation as at the balance sheet date.

Depreciation on the Property plant and equipment is provided using written down value method over useful life of assets as specified in schedule II to the Companies Act, 2013. Depreciation on Property Plant & equipment addition/deletion during the year has been provided on pro-rata basis from the date of such addition or upto date of such deletion as the case may be. Freehold land is not depreciated.

The assets' residual values, useful lives and method of depreciation are reviewed at each financial year end and are adjusted prospectively, if appropriate.

Property plants and equipment are eliminated from financial statement, either on disposal or when retired from active use. Profits/Losses arising in the case of retirement/disposal of property plant and equipment are recognized in the statement of profit and losses in the year of occurrence.

Leasehold Lands are amortized over period of lease. Buildings constructed on leasehold land are depreciated based on the useful life specified in schedule II to the Companies Act, 2013, where the lease period of land is beyond the life of the building.

d) Intangible Assets

Intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any. Cost includes expenditure that is directly attributable to the acquisition of the intangible assets.

Identifiable intangible assets are recognised when it is probable that future economic benefits attributed to the asset will flow to the Company and the cost of the asset can be reliably measured.

Computer software are capitalized at the amount paid to acquire the respective license for use and are amortized over period of useful lives. The assets useful lives are reviewed at each financial year end.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognized.

e) Investment properties

Property that is held for long-term rental yields or for capital appreciation or both, is classified as investment property. Investment property is measured initially at its cost, including related transaction costs and where applicable borrowing costs. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance costs are expensed when incurred.

f) Depreciation/Amortization on Property, Plant & Equipment

Depreciation/Amortization on Property, Plant & Equipment (other than freehold land and capital work-in-progress) is charged on a Written Down Value Method Basis so as to write off the original cost of the assets over the useful lives. The useful life of the fixed assets has been adopted based on Technical Evaluation and in other cases, as prescribed under the Companies Act, 2013. Details for the same are asunder:

Class of Assets	Range of Useful Life
Building	05 - 60Years
Plant & Machinery	03 - 15Years
Furniture & Fixtures	10 Years
Office Machinery	10 Years
Vehicles	08 Years
Intangible Assets	03 - 04Years

g) Capital Work-in-Progress

Assets under construction wherein assets are not ready for use in the manner as intended by the management are shown as Capital Work-In-Progress.

h) Leases

A lease is classified at the inception date as a finance lease or an operating lease. A lease that transfers substantially all the risks and rewards incidental to ownership to the Company is classified as a finance lease.

Finance leases are capitalized at the commencement of the lease at the inception date at fair value of the leased property or, if lower, at the present value of the minimum lease payments. The corresponding liability is included in the balance sheet as a finance lease liability. Lease payments are apportioned between finance charges and reduction of the lease liability so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are recognised as finance costs in the statement of profit and loss.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Assets acquired on leases where a significant portion of the risks and rewards of ownership are retained by lessor are classified as operating leases. Operating lease payments are recognised as an expense in the statement of profit and loss on a straight-line basis over the lease term except where another systematic basis is more representative of time pattern in which economic benefits from the leased assets are consumed.

i) Impairments of non-current assets

An asset is considered as impaired when at the date of Balance Sheet, there are indications of impairment and the carrying amount of the asset, or where applicable, the cash generating unit to which the asset belongs, exceeds its recoverable amount (i.e. the higher of the net asset selling price and value in use). The carrying amount is reduced to the recoverable amount and the reduction is recognised as an impairment loss in the statement of profit and loss. The impairment loss recognised in the prior accounting period is reversed if there has been a change in the estimate of recoverable amount. Post impairment, depreciation is provided on the revised carrying value of the impaired asset over its remaining useful life.

j) Inventories

In general, all inventories of stock in trade, finished, work-in-progress etc. are stated at lower of cost or net realizable value. Cost of inventories comprise of all cost of purchase, cost of conversion and other cost incurred in bringing the inventory to their present location and condition. Cost of Work in progress are determined at acquisition cost plus direct costs of development and other direct overheads attributable to inventory. The inventories of financial instruments are stated at fair value.

k) Cash and Cash equivalents

Cash and cash equivalents include cash at bank and cash in hand and highly liquid interest-bearing securities with maturities of three months or less from the date of inception/acquisition.

In the cash-flow statement, cash and cash equivalents are shown net of bank overdrafts, which are included as current borrowings in liabilities on the balance sheet.

l) Borrowing Costs

Borrowing costs specifically relating to the acquisition or construction of qualifying assets that necessarily takes a substantial period of time to get ready for its intended use are capitalized (net of income on temporarily deployment of funds) as part of the cost of such assets. Borrowing costs consist of interest and other costs that the Company incurs in connection with the borrowing of funds. For general borrowing used for the purpose of obtaining a qualifying asset, the amount of borrowing costs eligible for capitalization is determined by applying a capitalization rate to the expenditures on that asset. The capitalization rate is the weighted average of the borrowing costs applicable to the borrowings of the Company that are outstanding during the period, other than borrowings made specifically for the purpose of obtaining a qualifying asset. The amount of borrowing costs capitalized during a period does not exceed the amount of borrowing cost incurred during that period. All other borrowing costs are expensed in the period in which they occur.

m) Taxation

Tax expense recognized in Statement of Profit and Loss comprises the sum of deferred tax and current tax except to the extent it recognized in other comprehensive income or directly in equity.

Current tax comprises the tax payable or receivable on taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. Current tax is computed in accordance with relevant tax regulations. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received after considering uncertainty related to income taxes, if any. Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive income or in equity).

Current tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realize the asset and settle the liability on a net basis or simultaneously.

Deferred tax is recognised in respect of temporary differences between carrying amount of assets and liabilities for financial reporting purposes and corresponding amount used for taxation purposes. Deferred tax assets are recognised on unused tax loss, unused tax credits and deductible temporary differences to the extent it is probable that the future taxable profits will be available against which they can be used. This is assessed based on the Company's forecast of future operating results, adjusted for significant non-taxable income and expenses and specific limits on the use of any unused tax loss. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date to recover or settle the carrying amount of its assets and liabilities. Deferred tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realize the asset and settle the liability on a net basis or simultaneously. Deferred tax relating to items recognised outside statement of profit and loss is recognised outside statement of profit or loss (either in other comprehensive income or in equity).

Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively

n) Earnings Per Share

Basic earnings per share is computed using the 'net profit for the year attributable to the shareholders (Before and After Exceptional Items)' and weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed using the 'net profit for the year attributable to the shareholder (Before and After Exceptional Items)' and weighted average number of equity and potential equity shares outstanding during the year including share options, convertible preference shares and debentures, except where the result would be anti-dilutive. Potential equity shares that are converted during the year are included in the calculation of diluted earnings per share, from the beginning of the year or date of issuance of such potential equity shares, to the date of conversion.

o) Dividend Distribution:

Annual dividend distribution to the shareholders is recognised as a liability in the period in which the dividends are approved by the shareholders. Dividend payable and corresponding tax on dividend distribution is recognised directly in other equity.

p) Employee Benefits

Short term employee benefits are recognised as an expense in the statement of profit and loss of the year in which the related services are rendered.

Post-employment and other long term employee benefits are charged off in the year in which the amount is paid to the employee.

q) Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. The company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the financial instrument.

i) Financial Assets

a. Initial recognition and measurement

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction cost that are attributable to the acquisition of the financial asset. Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date i.e., the date that the Company commits to purchase or sell the asset.

b. Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in three categories:

i) Financials Assets at amortized cost

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, debt instruments are subsequently measured at amortized cost using the effective interest rate method, less impairment, if any.

ii) Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The fair value is measured adopting valuation techniques as per prevailing valuation guidelines, to the extent applicable, as at the reporting date.

iii) Financial assets at fair value through profit or loss

Financial assets which are not classified in any of the above categories are subsequently fair valued through profit or loss.

c. Financial assets – De-recognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily de-recognized (i.e. removed from the Company's statement of financial position) when:

- a) The rights to receive cash flows from the asset have expired, or
- b) The Company has transferred its rights to receive cash flow from the asset.

d. Impairment of financial assets

Trade receivables

In respect of trade receivables, the Company applies the simplified approach of Ind AS 109, which requires measurement of loss allowance at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of trade receivables.

Other financial assets

In respect of its other financial assets, the Company assesses if the credit risk on those financial assets has increased significantly since initial recognition. If the credit risk has not increased significantly since initial recognition, the Company measures the loss allowance at an amount equal to 12-month expected credit losses, else at an amount equal to the lifetime expected credit losses.

When making this assessment, the Company uses the change in the risk of a default occurring over the expected life of the financial asset. To make that assessment, the Company compares the risk of a default occurring on the financial asset as at the balance sheet date with the risk of a default occurring on the financial asset as at

the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition. The Company assumes that the credit risk on a financial asset has not increased significantly since initial recognition if the financial asset is determined to have low credit risk at the balance sheet date.

e. Write-offs

Financial assets are written off either partially or in their entirety to the extent that there is no realistic prospect of recovery. Any subsequent recoveries are credited to impairment on financial instrument on statement of profit and loss.

ii) Financial Liabilities

a. Initial recognition and measurement

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, financial guarantee contracts and derivative financial instruments.

Financial liabilities are classified, at initial recognition, as at fair value through profit and loss or as those measured at amortized cost.

b. Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

i. Financial liabilities at fair value through profit and loss

Financial liabilities at fair value through profit and loss include financial liabilities held for trading. The Company has not designated any financial liabilities upon initial recognition at fair value through profit and loss.

ii. Financial liabilities measured at amortized cost

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate method except for those designated in an effective hedging relationship.

r) Current and non-current classification:

The Company presents assets and liabilities in statement of financial position based on current/non-current classification.

The Company has presented non-current assets and current assets before equity, non-current liabilities and current liabilities in accordance with Schedule III, Division II of Companies Act, 2013 notified by MCA.

An asset is classified as current when it is:

- a) Expected to be realized or intended to be sold or consumed in normal operating cycle,
- b) Held primarily for the purpose of trading & manufacturing.
- c) Expected to be realized within twelve months after the reporting period, or
- d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is classified as current when it is:

- a) Expected to be settled in normal operating cycle,
- b) Held primarily for the purpose of trading, & manufacturing.
- c) Due to be settled within twelve months after the reporting period, or
- d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash or cash equivalents. Deferred tax assets and liabilities are classified as non-current assets and liabilities. The Company has identified twelve months as its normal operating cycle.

s) Provisions, Contingent liabilities and Assets

i. Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The expense relating to a provision is presented in the Statement of Profit and Loss net of any reimbursement.

ii. Contingent Liabilities

Contingent liability is disclosed for (i) Possible obligations which will be confirmed only by the future events not wholly within the control of the company or (ii) Present obligations arising from past events where it is not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount of the obligation cannot be made.

iii. Contingent Assets

Contingent Assets are not recognized in the financial statements. Contingent Assets if any are disclosed in the notes to the financial statements.

t) Significant Accounting Judgements, Estimates and Assumptions:

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based on its assumptions and estimates on parameters available when the financial statements were prepared. However, existing circumstances and assumptions about future

developments may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Property, plant and equipment and Intangible Assets:

Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation to be recorded during any reporting period. The useful lives and residual values as per Schedule II of the Companies Act, 2013 or are based on the Company's historical experience with similar assets and taking into account anticipated technological changes, whichever is more appropriate.

Recognition of deferred tax assets:

The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the future taxable income against which the deferred tax assets can be utilized.

Contingencies:

Management has estimated the possible outflow of resources at the end of each annual reporting financial year, if any, in respect of contingencies/claim/litigations against the Company as it is not possible to predict the outcome of pending matters with accuracy.

Fair value measurements and Impairment of financial assets:

The impairment provisions for financial assets are based on assumptions about risk of default and expected cash loss. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

Recoverability of trade receivable:

Judgements are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the credit rating of the counterparty, the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.

Provisions:

Provisions and liabilities are recognised in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability require the application of judgement to existing facts and circumstances, which can be subject to change. Since the cash outflows can take place many years in the future, the carrying amounts of provisions and liabilities are reviewed regularly and adjusted to take account of changing facts and circumstances.

28. Financial Risk Management Framework

Risk Management

The Company's objectives when managing capital are to safeguard their ability to continue as a going concern, so that they can continue to provide returns for shareholders and benefits for other stakeholders and maintain an optimal capital structure to reduce the cost of capital. For the purpose of the Company's capital management, capital includes issued equity capital, and all other equity reserves attributable to the equity holders of the parent. The primary objective of the Company's

capital management is to maximize the shareholders' value. The Company manages its capital structure and makes adjustments in light of changes in economic conditions and the requirements of the financial covenants.

No changes were made in the objectives, policies or processes for managing capital during the years ended March 31, 2025.

The Company manages financial risk relating to the operations through internal risk reports which analyze exposure by degree and magnitude of risk. These risks include market risk, credit risk and liquidity risk. The Company does not enter into or trade financial instruments including derivative financial instruments for speculative purpose.

Credit Risk

The Company is exposed to credit risk from its operating activities (primarily trade receivables) and deposits with banks and other financial instruments. For banks and other financial institutions, only high rated banks/ financial institutions are accepted. The balance with banks, loans given to related parties, loan given to employees, security deposits are subject to low credit risk and the risk of default is negligible or nil. Hence, no provision has been created for expected credit loss for credit risk arising from these financial assets, The Company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in the credit risk on an ongoing basis throughout each reporting period, To assess whether there is a significant increase in credit risk the company compares the risk of a default occurring on the assets as at the reporting date with the risk of default as at the date of initial recognition. It considers available reasonable and supportive forward-looking information, for ex. External credit rating (to the extent available), actual or expected significant adverse changes in business, financial or economic conditions that are expected to cause a significant change to borrowers ability to meet its obligations.

The credit risk on investment in mutual funds is limited because the counter parties are reputed banks or funds sponsored by reputed bank.

Liquidity Risk Management

Ultimate responsibility for liquidity risk management rests with the Board of Directors, which has established an appropriate liquidity risk management framework for the management of the Company's short term, medium term and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

Rationale of the scheme beneficial to public shareholders of the Transferee Company

1. The scheme proposes a reduction of capital in the Transferee Company, along with the merger of the Transferor Company.

The reduction of capital of the Transferee Company in the manner set out in this Scheme can provide benefits to the shareholders and stakeholders as under

- The Transferee Company will represent its true and fair financial position with an efficient capital structure so that post-amalgamation capital structure is in line with the size of the business operations;
- The Transferee Company will have more efficient capital structure;
- Reduction in the authorized share capital of the Transferee Company to the minimum extent possible thereby optimizing the split between the paid up equity share capital and the premium on any further fund raise by the Transferee Company, if any, thereby reducing the cost of future fund raising, if any;
- Reduction in the costs associated for such change in the authorized share capital which would in turn benefit the shareholders, especially the public shareholders at large;
- The proposed reduction of equity share capital would not have any impact on the shareholding pattern of the Transferee Company except on account on amalgamation of the Transferor Company with the Transferee Company; and
- It does not involve any financial outlay and therefore, would not affect the ability or liquidity of the Transferee Company to meet its obligations or commitments in the normal course of business. Further, it would also not in any way adversely affect the ordinary operations of the Transferee Company

As a part of the overall restructuring exercise, it is desired to merge the Transferor Company with the Transferee Company.

- The amalgamation would have the following benefits:
- Enhancement of operational, organizational and financial efficiencies, and achieve economies of scale by pooling of resources;
- Unification and streamlining of legal and regulatory compliances currently required to be carried out by both, the Transferor Company and the Transferee Company;
- Elimination of multiple record keeping, thus resulting in reduced expenditure and significant reduction in the multiplicity of regulatory compliances; and
-

- Improved organizational capability and leadership, arising from the pooling of human capital that has diverse skills, talent and vast experience to compete in increasingly competitive industry.
- 2. The Scheme does not entail any discharge of consideration by the Transferee Company in form of cash, shares or otherwise. Hence, the interest of the shareholders is not adversely affected. The Transferee Company's shareholding pattern (before giving effect to the proposed amalgamation) subsequent to the reduction of share capital will remain unchanged.
- 3. Upon the Scheme becoming effective, entire undertaking including all properties, rights and powers and all debts, liabilities, duties and obligations of the Transferor Company shall be transferred to and vested with the Transferee Company on a going concern basis.
- 4. The provisions of the Part II of the Scheme have also been drawn up to comply with the conditions relating to "Amalgamation" as defined under section 2(1B) of the Income Tax Act, 1961 and therefore, it may not have any tax implications.
- 5. Further, pursuant to the Scheme, in consideration for the Amalgamation, the Transferee Company will issue its equity shares to the shareholders of the Transferor Company based on the Valuation Report.
- 6. Based on the above and as there is a proposed change in the shareholding pattern of the Company pursuant to the Scheme to the extent of issuance of new equity shares basis the share exchange ratio, the Company is of the opinion that the proposed Scheme is in the best interests of the shareholders of the Company and not detrimental to the interest of the shareholders, including the minority shareholders of the Company.
